The Sharks' introduction into the first-round of the 2019 NRL season will come in familiar fashion, with their loss to the Bulldogs set to be a formality. The biggest storyline of the week will see the Broncos and Rabbitohs come face-to-face in a winner-takes-all Round 1 clash at ANZ Stadium, while the Raiders' elimination from the draw will once again be accompanied by a terrifying snap result. [FIXED] Poor performance against Richmond proves costly for Titans As always, no side will go into the match with the certainty of victory. But the teams most in the mix for a place in the top four are arguably those with the best records in the match-ups to come. Matt Gillett's new club Knights name reveals a lot about their season BRONCOS (1) v RABBITOHS (2) Sergio Romo, Anthony Milford, James Roberts, Ben Hunt, Darius Boyd, Latrell Mitchell THREE PLAYERS TO WATCH Boyd Well, it would be hard to find an off-season buzz around the Melbourne star. With teammate Anthony Milford expected to be out for at least three months with a broken thumb, Boyd will get a chance to strut his stuff against South Sydney's key men. It will give his side the perfect chance to get their season started, and they will be looking for his sidekick to do the job for him. Hunt In the first half of the Broncos' first game of the season, their hooker Ben Hunt looked like he may have let a season-ender slip through his fingers. His side went down 6-0 to the Bulldogs and the former Manly man did not look like he was in the right frame of mind as he took his body to the sideline. Back from a calf injury, Hunt will be looking to show his teammates what he is made of and his unselfish nature will only help his cause. He will need to use his speed and agility to be a factor for the Broncos. Mitchell His new teammate is obviously Latrell Mitchell, but it was the interchange stint he showed in the Round 24 win over the Storm that really caught the eye. The 20-year-old looked to have a real impact on the match, his direct running, strong work-rate and scrambling ability is something the Broncos can build upon.

What's New in the?

And he also commented on the mass shooting in El Paso that left 22 people dead and just under two dozen others injured. "We are praying for the victims and for their families," he said. "When you see such tragedies you are reminded once again that white supremacy is real and it is evil. This has been a very tragic day." You can read the president's full statement below. I am praying for the victims and their families. When you see such tragedies you are reminded once again that white supremacy is real, and it is evil. From the time that I announced my intention to run for President, I have been using my voice to speak out against the terrible pain and horror of racism, bigotry, and white supremacy. Because these dangerous ideologies threaten our humanity and our future, they must be confronted and defeated. Hatred and division have no place in our society. We must unite together against hate. Two weeks ago, I had the privilege of meeting with the families, loved ones, and communities of those affected by the mass shootings in El Paso, TX, and Dayton, OH. I want to thank each and every person for sharing their stories, and for their strength in the face of such senseless violence. Love and kindness must truly conquer hate and division. I am with you. --- This post has been updated to include an updated statement from President Trump. A number of known trackways include a lead wheel and a pair of spaced, parallel guide rails. The wheels of the railcars or trucks are guided along the track by the rails so that the railcars or trucks do not derail. This kind of trackway is used to guide cranes along the trackway or other devices along the trackway. Railways often operate in conjunction with cranes or similar devices along the trackway. Trackways can be used in other ways. For example, a series of spaced parallel guide rails can be provided at the bottom of a shaft, e.g., a hole or tunnel, that has been bored into the ground. A series of adjacent guide wheels coupled to the railcar guide the railcar along the guide rails as the railcar traverses the shaft. However, known guide wheels are of a circular shape. Thus, the force applied to the guide wheel as the railcar traverses the shaft is not always equally applied to each of the guide wheels, as there are no intermediate guide wheels to support the railcar. For example, a railcar may be guided by
