## The Coroner Saga Activation Code [portable]

Download -->-->--> <http://bit.ly/2SKnMRu>

### About This Game

#### Become a Coroner

Sara is a young doctor who just completed Med School with the highest degrees. Uncertain about her future she joins the Coroners' State Institute and the adventure begins!

#### Deep and engaging narration

Written by award winner writer JD Glass, author of American Library Association (Stonewall) and Lambda Literary Award (Literature) finalist Punk Like Me, Punk And Zen, Lambda Literary Award and Ben Franklin Award finalist Red Light, GCLS finalist American Goth, and the critically acclaimed X; selection editor (and contributor) of GCLS Award winning anthology Outsiders, listed on the Advocate's Top 100 for CORE, Vol.1 Iss.1., the well-received First Blood, GCLS finalist Nocturnes, and the fan-awaited Glass Lions. Called by some the voice of a generation and the erotic philosopher by others, JD works in often familiar-seeming worlds, with people we know, people like ourselves, people we'd like to meet, and provides powerful stories that allow the reader to rejoice and wonder, stumble and fall, then rejoice victoriously again at the amazing experience of being human.

#### You decide your own fate

As with all Bruni Multimedia's videogames choices are the most important thing: will you pursue your career without any distraction or will you let your personal life to interfere with your dream to become a world-renown Coroner?

#### Episodic Release

The Coroner Saga will start releasing its first season on June 2019. Each season is made of 6 episodes and each episode's duration is about 3-4 hours in gameplay.

---

The game's replayability gives you the chance to start over and face completely new situations. *The Coroner Saga* is an episodic Visual Novel which will have you deal with Sara's personal and professional life as well. Meet new people, interact with colleagues and fellow doctors and uncover the truth behind several murder cases throughout the game's season.

**Medical accuracy**

Developed with the help of a real MD, the game features medical informations that are accurate and up-to-date. Please do not take medical informations other than for having fun in the game. If you experience some medical concern ask your doctor as soon as possible.

**Full HD graphics**

Developed in 1920x1080 resolution, The Coroner Saga's graphic is stunningly beautiful to look at.

**Original Soundtrack**

The game features a full 10-track original score you won't hear anywhere else.

**Playism. Added support for Oculus Rift and Windows Mixed Reality! Fixed Skyrim sprinting and zig zagging! Added profiles and more...:**

This update was really tough. Skyrim direction detection is weird. It's not HMD based or controller based. It's so weird we added its own option:

### Orientation:

when thumb moves up, player walks towards...

- Head direction
- Controller direction
- Skyrim

*"When thumb moves up, player walks towards Skyrim"*

It was working good enough in Vive by pure chance, because of how the controller is held. But it had a weird spot and was very

---

difficult to sprint. These issues were amplified a lot with Oculus Touch controllers, and we had to fix it before we announced Rift support...

Vive users will also see an improvement with these changes, as the active "forwards" area is bigger. Zig-zagging is fixed and running straight is now possible, which was a prerequisite for sprinting.

Did it improve Skyrim VR for you? Tell us below!

The activation button for most Rift profiles is thumb rest (the little touchpad-like thing).

Full list of changes:

- Added Oculus Rift support.
- Added Windows Mixed Reality (WMR) support.
- Added headset detection and have separate built-in profiles for each.
- Added "Skyrim" direction mode. Removed "Slerp" parameter.
- Set not to run game by default.
- Added most options to running profile screen.
- Added "run game now" button to running profile screen.
- Use original left trigger in FO4VR, flashlight is disabled for now.
- Removed "palm side down/up" remaps until they're fixed.
- Added Vive profiles for Kartong, H3VR, Payday 2 VR, Dead Effect 2 VR.
- Added Rift profiles for Onward, Pavlov VR, Payday 2 VR, Dead Effect 2 VR, Stand Out, in addition to the old Vive ones.
- Added WMR profiles for H3VR, Payday 2 VR, Dead Effect 2 VR, in addition to most of the Vive ones.

Known issues:

- 
- Some people must enable the "switch controllers" option. And some must have it off.
  - In Rift and WMR, sometimes it takes a bit longer to stop than it should. To be fixed soon.
  - Some profiles are not available on all headsets due to current limitations that will be fixed soon.
  - In Rift in some rare cases, if the demo is enabled, when starting Skyrim a black screen may appear. If that happens, disable the demo in settings.
  - WMR jump may be too sensitive. It will be adjusted and we'll add an option.

As usual, [head to the forum](#) to report issues.
